Made with a potato as usual really poor quality you can barely make things out. I have a titan xp & yet this looks really poor. Shame as its pretty unique advert, worth a look at it.. It's REALLY weird, but fun. Here's a video of it:

https://youtu.be/visQ_hhOsytM...." Immerse yourself into the Odyssey".... ? My SteamVR environment is more immersive than this low-quality 360 video. I think we'll have to wait for a couple of years before 360 Video will be capable of high quality (we need 16K cameras for that and the hardware to play it). And a couple of years more before VR video will have positional tracking (volumetric video. see : <https://youtu.be/DFobWjSYst4> For now, don't bother with this title or watch some videos with the Within app.. Have you ever thought what's inside the mind of Dabiz Mu\u00f1oz? Me neither, probably because i've never heard of him.

He's got some weird stuff going on in his head but unfortunately it's all in 360 video. Whilst there's a few effects that work most is a blurred mess. Not as badly done as Qantas VR but nowhere near as polished as Senza Peso.. Made with a potato as usual really poor quality you can barely make things out.
